CAMPAIGN DEBT DISCHARGED

(From The Mercury)

Frank Clark, the versatile Congressman from the Second District of Florida, made a speech thou good and faithful servant." the people? the other day in Miami which would lead one to believe that he his campaign obligations even at this late day. He seemed to feel while speaking that what he said was weak and insipid for he gave due notice that there might be criticisms. He said:

"My friends, as you know, am in politics, and I know full well there will be in Florida some souls so small that my poor trib ute to Mr. Flagler will be used against me. I expect this, but let me tell you something: I the day ever comes when I am too cowardly to render honor to whom honor is due for fear that I may lose the favor of some measly, 'two-by-four' street corner politician, then I ought to be kicked out of the field of politics with scant ceremony. I despise the selfish, miserly rich. I condemn and loath the crimina rich. But the man of vast wealth who expends his means in build ing up the waste places among us and for the betterment of man kind, is a benefactor of the race and deserving of our commendation."

"There will be IN FLORIDA SOME souls so small." ----MUSIC STRINGS.

The Great Amount of Material Required to Meet the Demand.

"One of the most generally accepted but mistaken ideas that are entertained by the people of this country," said a traveling representative of a foreign manufactory of gut strings, "is that strings used on musical instruments are manufactured from catgut. If that were true the cats in this world would have been exterminated many years ago in supplying the market with material for musical instrument strings.

"The fact is that they are manufactured from the intestines of sheep, and in obtaining enough raw material even from these animals the manufacturers

at times find difficulty. "The only string made from the intestines of the feline is that used for surgical purposes - for sewing up wounds. One would be amazed to know that there are millions of musical instrument strings used in North America alone, and just think where the tabbles would be if they had to supply the consumption.

"Another amazing thing is that there are over 700 different grades of musical Instrument strings. The demans for strings in North America is increasing every year, especially in the south and in Mexico. There are more guitar strings sold in Mexico than any other kind, but through the south the banjo string is still popular, despite the fact that every year has marked a slight but gradual falling off in the demand."-Kansas City Journal.
